

Standard Order Execution Time

Standard order execution time – is the standard time period of an order to pass through the execution process and filled or completed. To find the execution speed we need to calculate the Hold Time period. It measures the element of execution latency, which is the time observed by the trader between placing an order and receiving notification of the fill or rejection.

Table 1. Standard order execution times in Q1 2023 for transactions took place on cTrader.

| Instrument Category | Order Execution Time (Average) | Standard Order Execution Time* |
|---------------------------------------|--------------------------------------|--------------------------------------|
| | 50% of orders executed in less than: | 99% of orders executed in less than: |
| Forex CFDs | 335 ms | 401 ms |
| CFDs on Stock Indices and Commodities | 347 ms | 400 ms |
| CFDs on Cryptocurrencies | 160 ms | 297 ms |

Table 2. Standard order execution times in Q1 2023 for transactions took place on MT5.

| Instrument Category | Order Execution Time (Average) | Standard Order Execution Time* |
|---------------------------------------|--------------------------------------|--------------------------------------|
| | 50% of orders executed in less than: | 99% of orders executed in less than: |
| Forex CFDs | 2.52 ms | 45.31 ms |
| CFDs on Stock Indices and Commodities | 11.12 ms | 111.36 ms |
| CFDs on Cryptocurrencies | 17.96 ms | 115.74 ms |

* In the event of abnormal market conditions, the Client's order may be executed in a longer time than the standard one. Situations in which the market conditions deviate from the standard ones are listed in the Best Execution Policy.
